(PDF) Bipolar SCR ESD devices | Vladislav Vashchenko

This paper introduces an SCR based ESD protection design for SOI technologies. It is explained how efficient SCR devices can be constructed in SOI. These devices outperform MOS devices by about 4 times. Experimental data from 65 nm and 130 nm SOI is

(PDF) SCR based ESD protection in nanometer SOI

In this paper, we present an analytical model for determining surface electric field distributions in buried P-top lateral-diffused metal-oxide-semiconductor (LDMOS) devices with dual conduction and an enhanced dual conduction layer.

gene sheu | Asia University (Taiwan) - Academia.edu

A disadvantage with making the Earth ground connection would be in the special case of multiple power supplies sharing a common ground output, and supplying power to different parts of a distributed thing (like a room-size machine, etc.).

Power MOSFET failures in mobile PMUs: Causes and design

A Faraday cage or Faraday shield is an enclosure used to block electromagnetic fields. A Faraday shield may be formed by a continuous covering of conductive material, or in the case of a Faraday cage, by a mesh of such materials.

Faraday cage - Wikipedia

Sähköstaattinen purkaus (engl. Electrostatic discharge, ESD) eli staattisen sähköin purkaus on staattisen sähkövarauksen purkautumisilmiö. Riittävän suuren varauksen nopea siirtyminen saattaa näkyä pienenä kipinäpurkauksena ja sen voi tuntea, kun se tapahtuu esimerkiksi sormenpäässä.

The Basics of Air Ionization for High-Technology

Transistor transistor logic (TTL) is a logic family built from bipolar junction transistors. Its name signifies that transistors perform both the logic function (the first "transistor") and the amplifying function (the second "transistor"); it is the same naming convention used in resistor transistor logic (RTL) and diode transistor logic ...
