As data transmission speeds increase, separation of power

We live in the age of information, where communication and information processing are at the heart of our modern society. Intelligent transportation systems, smart cities, traffic safety, positioning and navigation, eHealth, Industry 4.0, and cloud services, all rely on our ability to store, share, process, and deliver massive amounts of data.

Communication Engineering | Chalmers

A range of technologies is offered - ultrasonic, radar, magnetic level gauges, float operated, vibration, RF capacitance. High accuracy magnetostrictive transmitters are available for liquids.
