Fundamentals of Vehicle Dynamics by Thomas d. Gillespie attempts to find a middle ground by balancing engineering principles and equations of use to every automotive engineer with practical explanations of the mechanics involved, so that those without a formal engineering degree can still comprehend and use most of the principles discussed.

Project is a temporary endeavor undertaken to create a unique product or service. Building a road is an example of a project. The process of building a road takes a finite amount of time, and produces a unique product. Operations, on the other hand, are repetitive. Generating bills every month, and
