The probability density function (pdf) of the nodal degree in the Erdős-Rényi random graph shown in Fig. 1.1 and in the Barabási-Albert power law graph in Fig. 1.2. The Watts-Strogatz small-world graphs (after random rewiring of links) possesses a relatively high clustering and short hopcount.

Understanding Complex Networks Using Graph Spectrum

We propose a general approach to the description of spectra of complex networks. For the spectra of
networks with uncorrelated vertices (and a local treelike structure), exact equations are derived.
