Compound Semiconductor Week (CSW) is the premier forum for science, technology and applications of compound semiconductors. CSW 2017 will be held at dbb forum in the center of Berlin, Germany, May 14-18, 2017.

Semiconductor materials are nominally small band gap insulators. The defining property of a semiconductor material is that it can be doped with impurities that alter its electronic properties in a controllable way.

III-nitride quantum dots are proving to be promising for application to single photon emitting devices. Research around the globe is revealing several interesting properties of these emitters, including a wide range of emission wavelengths, high temperature operation, and deterministic polarization of the emitted photons.
